WAGES AND HOURS OF LABOUR IN CANADA, 1920 TO 1928

THE present bulletin is the twelfth in the series on Wages and Hours of Labour, the first having been issued as a supplement to the LABOUR GAZETTE for March, 1921, giving figures as to wages and hours of labour in certain trades in various cities in Canada from 1901 to 1920, with index numbers by groups based on wages in 1913 as 100. Reports numbered two, three, four and six in the series continued this record with certain additions. Report No. 5 dealt with Hours of Labour in Canada and Other Countries. Report No. 3 contained also statistics of wages and hours in coal mining in Canada from 1900 to 1921 with index numbers for the three principal districts and Report No. 7 covered the years 1920 to 1924 and included figures for agriculture from 1914 to 1923. Report No. 8 gave additional statistics for factories, etc., for 1920 to 1924, and each subsequent report has contained additional information in this section. Report No. 11 contained an appendix on wages of employees of steam railways, considerably increasing the information both for recent years and back to 1901, with a new series of index numbers. The present report contains a table with samples of rates for lithographing, etc., in four cities. In certain tables, particularly Table X, it was necessary owing to lack of space to omit figures for 1924 and in some cases 1923, these years showing the least change.

The main object of these reports is to show the changes in wage rates and in hours during the periods covered. In each report the figures given constitute a continuous record from year to year, the figures in each being from the same sources, as far as is possible, continuity being thereby assured within reasonable limits. As more sources of information are available from year to year, the figures for previous years are secured, if possible, and included in order to secure continuity.

In the building trades, metal trades, printing trades and in employment on electric street railways the figures are given for thirteen cities throughout Canada. In the table on building trades figures for Windsor, Ont., have now been added. Information is secured from union agreements and from reports of representative employers and of trade unions secured each year. These reports are supplemented by figures secured by officers of the Department and by correspondents of the LABOUR GAZETTE resident in each city. The statistics as to building trades show the prevailing rates of wages and hours of labour for nine classes of labour for the years 1920 to 1928 inclusive for the building season beginning in the spring of each year. Sheet metal workers employed in building and construction are now included with the building trades. Sheet metal workers in factories are included in the table on factory trades so that the table for metal trades no longer includes sheet metal workers. In Table I, (*c*) on metal trades the figures are for custom and repair shops and do not include wages in the metal trades on railways, in mining, construction, etc. Figures for the metal trades in factories are given in Table X, sample rates for factory trades.

Wages in manufacturing and various other industries are shown by samples numbered one, two, etc. For common labour in factories, these are given by localities. The figures are secured from reports from employers and from such union agreements as are available.

On steam railways, wages of employees on the regular staffs are fixed according to agreements between the several railways and the organizations of railway employees, the principal railways having the same rates for nearly all the principal classes. The figures published are taken from these agreements.

In coal mining, the wages in the principal districts are arranged by agreements between the coal mining operators and the employees, in some cases represented by unions and in others by committees of employees. The figures published are taken from such agreements. The figures for average earnings of contract miners, however, are received from representative employers in each district. In some of the mines in each district the wages of unorganized employees are somewhat lower than those in such agreements. In metal mining the rates of wages and hours of labour are shown as samples for mines in the various parts of Canada.

For civic employees wages of policemen, firemen and labourers are shown by localities. For laundries, grain elevators, telephones and electric current production and transmission the figures are given by samples, as for factory labour.

Index Numbers of Wage Rates

In Report No. 1 tables of index numbers were given in order to show the general trend of the movement in rates of wages. The first

set of index numbers was for the rates of wages from 1901 to 1920 in the thirteen selected cities. For each series of rates, that is, for each trade or occupation in each locality, index numbers were calculated both from the hourly rates and from the weekly rates, and these index numbers were averaged for all localities, by groups, thus indicating the percentages of changes in weekly rates and in hourly rates. The year 1913 was taken as the base period, that is, the rate for 1913 in each case was taken as 100, so that the index numbers showed the percentage changes in rates from time to time prior to and since that date. An average was also made for all of the series in these tables, in order to indicate the general trend in wages in such trades as a whole. In making the average index numbers for the six groups the simple arithmetical averages were taken, no allowance being made for the importance of each trade or group by using a system of weighting. In Report No. 3 this table of index numbers for the thirteen cities was brought down to September, 1921.

In subsequent reports the table of index numbers of hourly rates only since 1901 have been reproduced, the figures since 1921 being calculated by ascertaining the average increase or decrease per cent in the figures for each group each year from the figures for the preceding year and adjusting the group index number accordingly. The index numbers therefore show approximately the movement of wage rates in each group for the past year as compared with the movement in previous years and show current levels as compared with levels in 1913. In Report No. 3 index numbers of daily wages in coal mining were given, calculated in the same manner as the index numbers in Report No. 1. The index number for the coal mining group since 1921 was calculated in the same manner as those of the other groups.

A table of index numbers of wages for factory trades, for common labour in factories, and for lumbering, calculated from the sample rates published was also given for the period 1911 to 1920 in Report No. 1. This has been brought down to 1928 in the same manner as the other index numbers since 1921 were calculated.

The classes of labour for which rates were used for the calculation of the index number table for the period 1901 to 1928, are, in the main, skilled trades; and practically all of these, even the unskilled, are in most cities organized to a great extent in trade and labour unions. The statistics given in these tables, therefore, show wage rates and hours of labour in a number of organized occupations in certain cities at the dates under review. They do not, however, indicate the changes in wages outside of industrial centres.

The index numbers calculated from sample rates of wages show to some extent the trend of wages for labour in factories, and for the lumbering industry as compared with the changes in the classes mentioned above.

Changes since 1920

The table of index numbers here given includes the figures referred to above for each group with yearly averages for the groups for which figures are available from 1901 to 1928.

It will be seen that by 1920 wages had reached levels almost one hundred per cent higher than in 1913, in some groups the increase being over one hundred per cent while for the building trades the increases were appreciably less, being only about eighty per cent. Since 1920 all groups have shown some decreases, although printing trades and coal mining were higher in 1921 than in 1920, declining somewhat thereafter. The decreases in coal mining in 1925 were comparatively steep and tended to reduce the average for all groups. Since 1925 there have been changes in several groups, raising the average for the six groups each year.

In the building trades up to 1919 there were smaller increases than in any of the other groups, but in 1920 there were considerable increases. In 1921 decreases of 10c. per hour were general and in 1922 decreases of 5c. per hour were numerous. In 1923, 1924 and in 1925 while there were upward movements in the average it was due to increases in particular trades and in certain cities, and not to an upward movement general for most of the trades and localities. From 1926 to 1928, the upward movement was somewhat more general.

In the metal trades the increase in wage rates up to 1920 was greater than in most of the other groups, there being a good demand for labour in the manufacture of munitions. During the industrial activity in 1919 and 1920 further increases were made, but in 1921 and 1922 considerable decreases were made. In 1923 and 1924 some recovery was experienced, but in 1925 there was practically no change. Since that year there were some slight changes upward.

In the printing trades up to 1920 increases were about the same as in the building trades, but in 1921 when many of the three or five-year agreements between employers and the unions expired, rates were advanced and hours were reduced in many cases. Increases have appeared each year since.

In electric railway service, rates had almost doubled by 1920, but declined slightly in 1921 and 1922, recovering somewhat in 1923 and very gradually each year thereafter.

In steam railway employment, wage increases were considerable in 1918, 1919 and 1920, but in 1921 decreases averaging about twelve per cent for all classes were made and in 1922 decreases for shop crafts, maintenance of way employees and for freight handlers, clerks, etc., were made averaging about ten per cent. In 1926 at the end of the year wages of conductors, trainmen, brakemen, baggagemen, and yardmen were advanced about 6 per cent, that is by half the amount of the reduction in 1921, and during 1927 similar increases were made in rates for other classes.

In coal mining the index number reached its peak in 1921, increases having been made in the closing weeks of 1920. In 1922 decreases were made in some districts and in other districts in 1923 and 1924. In 1925 decreases occurred in the three principal districts, being especially steep in Alberta and southeastern British Columbia (as in 1924), where no decreases occurred until 1924. In 1926, reductions were effected in Nova Scotia but in the other chief fields were practically unchanged, but an increase was made in certain mines in Alberta at the end of 1925. Slight increases were made in some mines in Alberta in 1928.

Factory labour had shown almost the greatest percentage increases up to 1920, both for common labour and for the various trades, but in both cases steep decreases appeared from 1921 to 1923, after which increases appeared each year except in common factory labour in 1928.

In logging and saw milling steep increases in wages appeared up to 1920, followed by particularly steep decreases in 1921, after which substantial increases occurred in 1923 and 1924, with a decrease in 1925 and slight increases in 1926, in 1927, and in 1928.

†Reports to the Labour Department indicate wages in 1928 were about the same as in 1927.

APPENDIX B

Wages and Hours of Labour Under Minimum Wage Boards in Canada

Seven of the provinces of Canada have enacted legislation providing for minimum rates of wages for female employees in certain industries, and also have certain restrictions of hours. In British Columbia similar legislation applies to males, both as to wages and hours. In Alberta the legislation applies to males in certain respects. Such legislation was first enacted in these provinces as follows: British Columbia and Manitoba in 1918; Saskatchewan and Quebec in 1919; Alberta, Nova Scotia and Ontario in 1920. The British Columbia legislation as to wages for adult males was enacted in 1925 but that as to hours in 1923. In each province these statutes became effective through orders issued and administered by Boards. In Nova Scotia no Board has yet been provided for, and a Board was established in Quebec in 1926.

The accompanying table gives summary figures as to the minimum rates of wages in force under these Boards during 1928. Orders and amendments issued from time to time have appeared in summary form in the Labour Gazette when issued. In some provinces these orders include regulations as to employment conditions, terms of employment, sanitary conditions, etc., and all provide for variations under license from the Boards to permit lower rates of pay for handicapped employees, etc., and to meet special conditions in the nature of emergencies.

In this table the figures for adult learners and for minors and apprentices are shown in a range covering both classes. There is considerable variation in the rates for such classes in the various industries and the time allowed for such periods varies considerably, from a few weeks to two years and upwards. The number of learners and apprentices is usually restricted to twenty-five per cent of the employees.

The hours of labour are in most provinces restricted by the various factory and similar Acts, and in some provinces the Boards have power to make further restrictions. In Ontario the Act was amended to give the Board authority to state the hours for which the minimum rates were payable and to establish rates for additional hours. The hours for female employees are limited by the factory act to ten per day and sixty per week, additional hours being permitted only when authorized by the factory inspector to meet emergencies and under certain limitations. In Quebec the provision is similar except that in cotton and woollen mills the maximum hours are ten per day and fifty-five per week.

The information here given is intended to afford merely a statistical summary of the minimum wages and restricted hours of labour in the provinces and industries affected and while some of the more significant details have been given in footnotes, it has been found impossible to include the information in such form as to indicate any more than the general conditions under these provisions.

MALE EMPLOYEES

The legislation in British Columbia as to conditions for male employees provided for the eight-hour day and forty-eight-hour week in 1923 in the Hours of Work Act, administered by a Board of Adjustment, and in 1925 the Male Minimum Wage Act authorized this Board to fix rates of pay for all male employees except farm labourers, fruit pickers, fruit packers, fruit and vegetable canners and domestc servants. The Board has ordered minimum rates of forty cents per hour in the lumbering and wood-working industries. In the catering industry 32½ cents per hour for a straight shift and 35 cents per hour for a split shift have been ordered in establishments where the employer provides meals, and 40 cents per hour for a straight shift and 42½ cents per hour for a split shift where meals are not provided. The validity of the orders of this Board came before the courts during 1928 (Labour Gazette, November, 1928, p. 1310).

In Alberta legislation in 1926 provides that no male may be employed at a less wage than the minimum rate for female employees in the same class of work except in the case of apprentices under indenture approved by the Commissioner of Labour, who is the Secretary of the Minimum Wage Board.

* Applicable to cities and certain towns only. † Applicable to certain cities only.

(a) In Manitoba in brickyards and in seasonal and casual employment in industries not otherwise covered a minimum wage of $12 per week or 30 cents per hour is established.

(b) For Ontario the ranges of rates shown for experienced adults cover the various rates set for localities according to population.

(c) Seasonal canneries not included under order.

(d) The Factory Act provides for maximum hours, for female employees, 10 per day and 60 per week.

(e) Textile and knitting factories only.

(f) The Factory Act provides for maximum hours, for female employees, 10 per day and 60 per week except in cotton and woollen mills, 55 per week.

(g) Probationary period without minimum rate.

(h) Winnipeg and vicinity only under order.

(j) In mail order houses and in retail stores in certain cities and towns.

(k) In the fishing industry a minimum rate of $15.50 per week (48 hours) or 32 7/24 cents per hour is set for experienced workers (12 months); $12.75 to $14.75 under one year.
